

MX Logic®

Complete Managed Network Defense

Email threats, botnets, spyware and viruses – malware that is targeting your network and your employees is growing in volume and in complexity. While the infection rate is daunting, businesses that implement integrated managed security solutions can protect their networks and corporate information with more comprehensive online security, while benefitting from a reduction in wasted time and money.

MX Logic managed security services are built to protect your organization from the wide range of threats inherent to conducting business online. Supported by industry-leading technology and an experienced team of threat experts, our services offer enterprise-class performance and functionality, plus easy administration and use. MX Logic services work outside the network perimeter and require no hardware or software integration.

SUPERIOR MANAGED SECURITY SERVICES

Both the MX Logic Email Defense Service and MX Logic Web Defense Service block threats outside the network perimeter before they can enter and harm the corporate network. These robust managed services are more accurate, easier to implement, more cost-effective to maintain, and have a greater return on investment than software and server/gateway appliances.

With MX Logic Message Archiving you gain electronic oversight to help you more completely manage, store and retrieve email messages – ultimately minimizing the costs and risks associated with non-compliance, loss of proprietary information and inappropriate employee emails.

KEY BENEFITS

- Block email and Web threats before they can harm your internal network
- Significantly reduce bandwidth consumption
- 24x7 monitoring and protection
- Rapid, automatic updates
- Effective group policies management
- Free up IT resources
- Increase employee productivity
- Simple, effortless activation – no hardware or software required
- Live, 24/7 customer support
- **Email Security** – Protects your organization from spam, viruses and worms, email attacks and fraud with an affordable, effective email security solution that is easy to administer and use, and automatically updated to protect against the latest threats.
- **Message Archiving** – Provides robust message storage and retrieval capabilities, and features an easy-to-use, Web-based administrative console.
- **Web Security** – Easily and effectively protect employees and network assets from Web-based threats such as spyware, viruses and phishing attacks, while also gaining control over unauthorized workplace Internet usage.

SOLUTIONS TO SUPPORT YOUR UNIQUE NEEDS

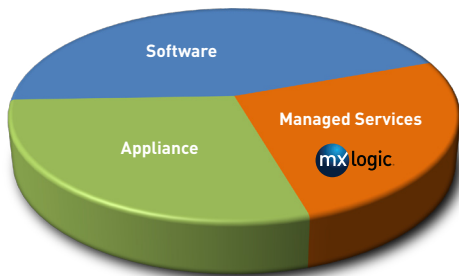

MX Logic Managed Security Services are designed, packaged and priced to suit any organizational need – from network defense to compliance.

- State and Local Government
- Education
- Manufacturing
- Healthcare
- Finance
- Legal

“The need for greater security is compelling organizations to consider using managed security service providers for some or all of their IT security needs.”

ABERDEEN GROUP, 2008
